The screenshot shows the GitHub profile page for user **aditha2147**. The profile includes a custom avatar, a bio, and a join date of "Joined 31 minutes ago". The "Popular repositories" section displays two repositories: **test1** and **test2**, both marked as "Public". The "6 contributions in the last year" section features a calendar grid for the year 2024, with a green square indicating a contribution on Friday, August 8th. The "Contribution activity" section shows a timeline of recent activity, including "Created 3 commits in 1 repository" and "Created their first repository".

The image is a screenshot of a web browser displaying a GitHub repository page. At the top, the repository name 'aditha2147 / test2' is visible. Below this, there are navigation tabs: 'Code', 'Issues', 'Pull requests', 'Actions', 'Projects', 'Wiki', 'Security', 'Insights', and 'Settings'. The 'Code' tab is selected. Under the 'Code' tab, there is a dropdown menu showing 'main' and a link to 'test2 / README.md'. The file 'README.md' is open, showing the content 'SCS1303'. Above the file content, it says 'aditha2147 Update README.md'. Below the file content, there is a status bar that says '1 lines (1 loc) · 10 Bytes' and 'Code 55% faster with GitHub Copilot'. At the bottom of the screen, there is a Windows taskbar showing the weather as '32°C Mostly sunny' and various application icons including the Start button, Search, Task View, and several open applications like Microsoft Edge, File Explorer, and WhatsApp.
